

Off-road enthusiasts can take comfort in improved safety by adding the FIAMM UTV horn kit to their vehicle. The completely universal system produces a powerful high sound of 125 decibels per horn which ensures that you are heard wherever you may ride. The splash guards on the horns provide excellent protection against water to ensure years of dependability. The universal kit comes with everything needed for an easy installation. The kit includes a high and low tone horn, relay, inline fuse, horn button, sac assembly (female and male connectors), and 10" of wire.
